**DETAILED ACTION**

1. Claims 1-7, 14-16, and 19-22 are pending.
2. Amendment filed 01/12/2007 has been received and considered.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-7, 14-16, and 19-22 are rejected under 35 U.S.C. 102(a) as being anticipated by Yahoo! (Archived Web pages from 08/16/2000).

As per claims 1, 5, 14-16, 19, and 21, Yahoo discloses enabling a user to select a method of authentication for access to the restricted service, wherein the restricted service requires a method of authentication in order to gain access to the restricted service (see page 1 choosing a username and password); registering the user-selected method of authentication which facilitates the user's ability for gaining

Art Unit: 2137

access to the restricted service (see page 1); presenting the registered method of authentication as the method of authentication for access to the restricted service (see pages 1 and 3 the logging into the Yahoo account); wherein the user is enabled to select a different method of authentication for access to the restricted service without accessing the restricted service (see pages 2 and 4 where the user can log in as normal, or go through the forgotten password to obtain a new password to log in or the user can sign in using a different username and password); wherein the registered method of authentication is presented as the method of authentication for subsequent attempts to gain access to the restricted service without requiring subsequent re-registration of the registered method, until such time as the user selects such different method of authentication (see page 3).

As per claims 2, 6, 20, and 22, Yahoo discloses the method of authentication includes at least one of user identification and password; user identification and pass-phrase; smart card and PIN; smart card and digital certificate; biometrics; sound verification; radio frequency and password; infrared and password; and handheld computing device and digital certificate (see pages 1-4).

As per claims 3 and 7, Yahoo discloses enabling the user to select more than one method of authentication for access to the restricted service (see page 4).

As per claim 4, Yahoo discloses the step of registering the user-selected method of authentication as a minimum level of security for authentication for the user (see page 1).

The selected method of authentication is a minimum level of security for authentication because at least the selected method must be performed.

#### ***Response to Arguments***

4. Applicant's arguments, see Remarks, filed 01/12/2007, with respect to the 112, first paragraph, rejection of claims 2, 6, 20, and 22 as lacking support in the specification have been fully considered and are persuasive. The 112, first paragraph, rejection of claims 2, 6, 20, and 22 has been withdrawn.

5. Applicant's arguments with respect to claims 1-7, 14-16 and 19-22 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
